

Essex Silver Line Floor Sanders

Since 1958, Essex Silver-Line Corporation has been manufacturing floor sanders with one goal in mind; to manufacture the world's finest floor sanders. Today, Silver-Line sanders are known worldwide as the leader in floor sanding equipment. Each Silver-Line machine is not only hand built by skilled New England craftsmen with an eye for detail but also tested and packed in the USA to assure quality and performance. Essex Silver-Line has a product for all of your hardwood flooring needs. Our products range from our Rental Product Line of sanders, designed to be a great addition to your rental fleet and make your customer feel like a flooring pro at a fraction of the cost, to our Professional Line designed with the professional contractor in mind.

SL-8 Drum Sander

The SL-8 floor sander is the only machine on the market that will allow the DIY customer to achieve the results they want and expect.

The 1 hp constant speed motor and soft rubber drum with our unique cam locking system combine to work like a professional sander. The sandpaper is held between 2 spring-loaded cams. The slow (1800 RPM) constant speed of the drum will not gouge floors.

The tilt action for the SL-8 allows for more controlled and even sanding when compare to other machines available to the rental trade. When you sand forward and backward with the SL-8, you can be assured of straight sanding because it runs on the drum and wheels. The weight of the machine is specifically designed and evenly distributed for the best results.

We have manufactured the SL-8 with a 1 hp completely sealed, repulsion-induction Baldor motor. It will run the drum at 1800 RPM constantly on 14 amps (standard household current). Because of this design, unique to the Silver-Line motor, the drum will not slow down or speed up as it sands, resulting in a level, smooth finish without waves.

Standard Equipment

25' power cord with twist lock connectors and standard plug, dust bag & wrenches.

Over-All Dimensions, Length 28" – Width 15" – Height 34"

Specifications, Motor – 1 HP constant speed, 115 volt, AC only, 60 Cycle, single phase. Runs on 14 amps.

Drum – Standard 8" width, soft rubber cover with aluminum drum core, spring loaded cam paper locking system, takes 8 x 20 3/16" paper

Net Weight – 115 lbs.

Caution: To prevent the possibility of fire, always empty the bag and dispose of its contents immediately after use. Do not empty near flame.

SL1218OVS Orbital Refinisher

Essex Silver Line's SL1218OVS 12" x 18" Orbital Polisher/Refinisher offers a 1.5hp motor, rugged cast aluminum base with weight built into the chassis.

The fan cooled, sealed Baldor motor is protected from dust. Heavy-duty rubber towers in four corners support the base and plate protecting the motor shaft and allowing easier operation.

Features

1.5 HP Hi-torque Baldor Motor Runs on only 11 amps!

Heavy Duty Vacuum System for superior dust collection!

Self-Leveling Skirt With Crimped Nylon Bristles

Hi Impact Polyurethane Dust collectors located on the sides & rear of machine!

Carry Handles

SL-7 Floor Edger

Designed and engineered to stand up to the toughest customer, the SL-7 delivers excellent results. It's built to give tip performance on the toughest jobs. The Powerful motor delivers 3600 RPM for the fast, smooth cutting you want. The oversized vacuum fan and chamber work together to achieve superior dust pick up. The conveniently place light will help brighten dark corners and closets. Fast moving parts are electronically balanced for vibration free operation. The entire machine is perfectly balanced to handle smoothly and maneuver well with easy grip handles.

Standard Equipment: 25' power cord with twist lock connectors and standard plug, dust bag & wrench

Over-All Dimensions- About 10" Diameter – Height 13"

Motor – 1.5 HP Universal Motor, 115 volt, AC.

Disc Pad – 7" Diameter, rubber backed with steel, precision balanced, 3600 RPM

Disc Guard – Free wheeling, non-marking

Vacuum – Oversized rerouted chamber for extra-clean pickup.

Net Weight – 30 lbs.

U-2D Under Radiator Sander

The Silver-Line U-2 Under radiator Sander is perfect for hard to reach areas. We designed this machine to do a job quickly, easily and keep the machine simple at the same time. Install a 5" PSA disc onto the cloth face of the pad, plug the unit into a standard outlet and you can sand under baseboards, toe kicks, porch railing, radiators and other projecting built-ins. The U-2 has a 10" nose with a 1.5" clearance; it will get the job done. The .5 HP motor drives the disc at 2000 RPM, more than enough to complete the job. We use motorcycle style handgrips to reduce fatigue and ball type casters for maneuverability.

Standard Equipment- 25' 14/3 power cord with twist lock connectors and standard plug

Over-All Dimensions-Length 17 1/2" – Width (across handles) 14" – Height 12"

Specifications

Construction – Molded anodized steel

Motor – .5 HP Motor, 115 volt, AC

Disc Pad – 5" Diameter, rubber with cloth face, backed with steel, 2000 RPM

Belts – "V" Belts drive from the motor to the disc pad

Net Weight – 24 lbs.
